PROFESSIONAL SUMMARY

Flutter Developer with 5+ years of experience building cross-platform mobile applications across fintech, food-tech, and transportation domains. Comfortable working with BLoC, MVVM, and CLEAN architectures, along with secure payment integrations and Firebase-based real-time solutions. Completed coursework for MS Data Science, with hands-on exposure to AI-powered applications using LLMs, Retrieval-Augmented Generation (RAG), Python backends, and vector databases. Interested in combining software engineering with applied AI to build practical mobile experiences.

CORE SKILLS

Mobile Development	Flutter • Dart • iOS (Xcode) • Android Studio • Cross-Platform Apps • Play Store & App Store Publishing
State Mgmt & Arch.	BLoC • GetX • Provider • MVVM • CLEAN Architecture • MVC • Scalable Codebases
APIs & Backend	RESTful APIs • Firebase (Auth, FCM, Firestore) • Google Maps & Navigation APIs • Real-Time Sync
Payments & Security	Stripe • Square • JazzCash • Google Pay • Apple Pay • Firebase OTP Authentication
DevOps & Tools	Git • GitHub • GitLab • Bitbucket • CI/CD Pipelines • VS Code • Android Studio • Xcode
Databases	Firebase Firestore • SQLite • Data Modeling
AI & Data Science	Machine Learning • Deep Learning • Large Language Models (LLMs) • Retrieval-Augmented Generation (RAG) • Python (Pandas, NumPy, Scikit-learn) • Distributed Data Processing • Data Analysis
Flutter Web	Responsive UI • Portfolio Web Apps • Netlify Deployment • Flutter Web Optimization

PROFESSIONAL EXPERIENCE

Mobile App Developer (Part-Time Remote)

Sep 2023 – Present

American Taxi Dispatch Inc., Chicago, IL, USA

- Engineered a full-featured cab booking app achieving 100,000+ active users via optimized Google Maps & Navigation API, cutting dispatch response time by 15%.
- Raised transaction success rate by 18% by architecting a unified Stripe & Square gateway with native Google Pay and Apple Pay support.
- Increased daily user retention by 20% through Firebase OTP authentication and a real-time push notification system, significantly reducing login friction.

Senior Flutter Developer (Contract)

May 2024 – Nov 2024

Evamp & Saanga, Islamabad, Pakistan

- Led development of telecom mobile and web applications serving 100,000+ users, maintaining 98.9% uptime with zero critical production failures.
- Reduced average API response time by 20% via RESTful layer refactoring and strategic caching, directly improving perceived app speed.
- Mentored 4 junior developers on BLoC & Provider patterns, raising team code-quality scores by 30% in monthly peer reviews.

Software Engineer

Sep 2022 – May 2024

Infiniun Pvt Ltd, Islamabad, Pakistan

- Spearheaded Feyst (FoodTech) from zero to publish on Play Store & App Store.
- Integrated secure payment gateway (Credit Card & JazzCash) achieving 99% checkout success rate.
- Improved app responsiveness by 40% with BLoC state management, reducing UI jank and session crashes by 85%.

Flutter Developer

Nov 2021 – Aug 2022

Codes Orbit Pvt Ltd, Islamabad, Pakistan

- Delivered fitness and retail Flutter app using GetX state management and MVC architecture.
- Increased user retention by 22% by redesigning UI/UX flows and optimizing RESTful API data-fetch strategies.
- Maintained 100% clean code compliance and zero critical Git conflicts through strict version control practices.

Junior Flutter Developer (Remote)

May 2021 – Oct 2021

Softologics, Karachi, Pakistan

- Developed and optimized modular UI components for cross-platform applications using Flutter and Dart.
- Assisted senior developers in building responsive front-end layouts and application styling.

PROJECTS & PORTFOLIO

Personal Portfolio Website

Flutter Web • Responsive UI • Service Showcase • Integrated Booking System

Modern Flutter Web portfolio featuring a fully responsive UI, dynamic project showcase, service offerings, and an integrated client booking system — built end-to-end in Flutter and deployed.

Website: www.ahsanjaved.dev

American Taxi Dispatch — Cab Booking App

Flutter • Google Maps API • Stripe/Square • Firebase OTP • Push Notifications • MVVM

Full-featured ride-hailing app with real-time GPS tracking, multi-gateway payments, Firebase OTP authentication, and push notifications. 10,000+ active users. Published on Play Store & App Store.

Play Store: play.google.com/store/apps/details?id=com.ataxi.orders.ui

App Store: apps.apple.com/us/app/american-taxi-dispatch/id698080106

Feyst — Food Tech Platform

Flutter • BLoC • JazzCash • Credit Card Gateway • Real-Time Order Tracking

Multi-restaurant ordering platform with secure multi-gateway payments, real-time order tracking, and BLoC state management. 5,000+ downloads, 4.5-star rated. Published on Play Store & App Store.

Play Store: play.google.com/store/apps/details?id=com.feyst.foodies

Rental AI — AI-Powered Rental Agreement Analyzer

Flutter • Python • Mistral LLM • ChromaDB • RAG • PDF Processing • Runpod

Developed an AI-powered mobile app using Flutter and Python that analyzes rental agreements via RAG and Mistral LLM, deployed using a rented GPU pod on RunPod. The system processes documents through tokenization and vector embeddings for semantic search, featuring rental clause analysis to help users easily identify problematic contract terms.

EDUCATION

MS Data Science (Coursework Completed, Thesis in Progress)	2025–Present
MSc Computer Science	2021
BSc Mathematics & Computer Science	2015

CERTIFICATIONS

Certifications:

- **Artificial Intelligence Using Python** (Virtual University of Pakistan - 2026)
- **Python Essentials 1** (Cisco Networking Academy – 2026)
- **Creative Design** (E-Rozgaar - 2021)
- **Freelancing** (Virtual University of Pakistan - 2021)
- **WordPress** (Virtual University of Pakistan - 2021)

TECHNICAL INTERESTS

Mobile AI Applications • LLMs • RAG Systems • AI Agents • Data Science • Flutter Architecture
